## TOPICS

- Magnetic materials and diluted magnetic semiconductors
- Organic, hybrid and composite materials
- Nanoparticle materials and nanolithography
- Physics and technology of carbon nanotubes and carbon-based materials
- Photonic and optoelectronic materials
- Nanobiotechnology
- Thin and thick films
- Catalytic materials
- Physics and technology of nanostructured semiconductors and superconductors
- Auxetic materials and models
- Micro/Nano Electro Mechanical Systems (MEMS/NEMS): technology and applications
- Industrial applications of nanotechnology

## HONORARY CHAIRMEN

Sir S. Edwards (Cambridge, UK) J. T. Devreese (Antwerp, B)  
G. J. Papadopoulos (Athens, GR)

## SCIENTIFIC COMMITTEE

I. Berbezier (Marseille, FR) A. V. Melechko (NC, USA)  
N. Guskos (Athens, GR) Co-Chairman U. Narkiewicz (Szczecin, PL)

Abruzzo, L'Aquila and Sulmona

Strikingly beautiful landscapes extending from the Adriatic coast to the highest peaks of the Apennine range, characterize the Italian region of Abruzzo. Here, within a relatively small area of land, one finds incredibly diverse geological features such as the Majella and Gran Sasso (in the LOGO) mountains, and soft sandy beaches washed by the Adriatic sea. Abruzzo hosts the typical mountain villages of Pescasseroli, Scanno, Pescocostanzo, the seafront towns of, Ortona, Lanciano, Vasto, and the historic art cities of L'Aquila, and Sulmona (pictures below).

Chiesa di Collemaggio (L'Aquila)

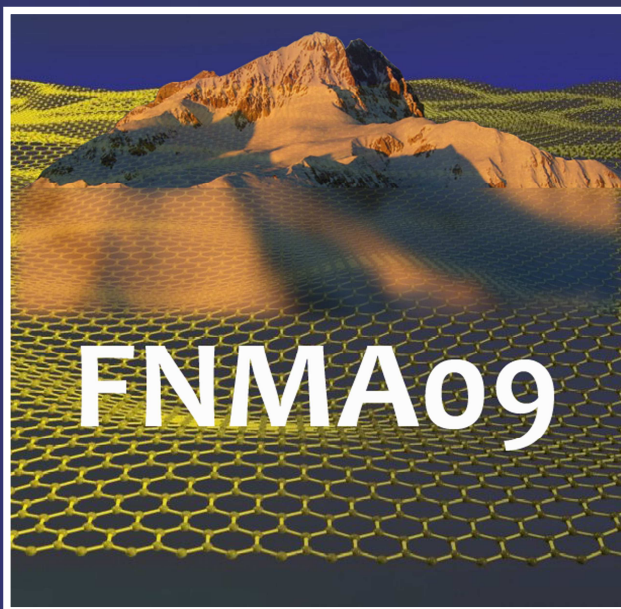

Palazzo dell' Annunziata (sulmona)

Ovidio Statue (Sulmona)

... A maze of narrow streets lined with baroque or renaissance buildings and churches, opening onto elegant piazzas, home the location on the FNMA09 Conference in Palazzo dell'Annunziata in Sulmona-L'Aquila.
